To whom it may concern,

I am writing to express my interest in the Software / Web Developer position at your organization. I am currently pursuing a B.Tech in Computer Science and Engineering at Lovely Professional University, with a strong passion for building practical, real-world technology solutions.

I have hands-on experience in web development, backend systems, AI-powered applications, and robotics. My skill set includes C, C++, Java, Python, PHP, along with React.js, Node.js, MongoDB, MySQL, Git, and Tailwind CSS. I enjoy working across the stack and adapting quickly to new technologies.

My project work includes BuddyAI, an AI-powered chatbot using the ChatGPT API, and a Smart Logistics System for automating inventory and shipment workflows. I have also worked on computer vision using OpenCV and developed Arduino-based robotic systems using IoT sensors and embedded C.

Through internships at GetInterned and LPU, I contributed to live projects, improved UI responsiveness, and collaborated with development teams. Additionally, as Outreach Head at RISC, I strengthened my leadership and communication skills.

I am a motivated learner with a strong problem-solving mindset and have solved 100+ DSA problems. I am eager to contribute my skills, learn continuously, and grow as a software professional within your organization.

Thank you for your time and consideration.

Sincerely,

Faizan Iqbal
